

air panel saw

The Eurotec PS1 Air Saw features the following:

- Ergonomic design.**
 The remarkable vibration reduction of the new PS1 Air Saw, gives the user a new working sensation. With 12,000 cutting strokes per minute it produces an effortless cutting action which prevents tearing on thin panels, leaving a burr free finish.
- Enhanced safety features.**
 The improved safety features prevents accidents from occurring as the saw cannot be started unintentionally. It incorporates an integrated finger shield in the body of the saw to prevent injury.
- Adjustable to suit your requirements.**
 The red regulating screw on the saw head is used for controlling the guide fork, which in turn alters the cutting depth of the blade. To cut curves precisely, just advance the guide fork a little. Now you can cut with the tip of the saw blade allowing for extremely high accuracy of cutting.
- Swiss made reliability**
 The high manufacturing quality of the saw guarantees a long life span and full power, cutting panels up to 4mm thick!
- Easy to use**
 Minimal training is required to create a professional operator. Also, within seconds the saw blade can be removed and exchanged with another blade.

SAW BLADES AVAILABLE

14 tpi (teeth per inch)	For wood, aluminium & plastic
18 tpi (teeth per inch)	For narrow curves
24 tpi (teeth per inch)	For multi layer metals up to 4mm
32 tpi (teeth per inch)	For light gauge metals up to 1mm

TECHNICAL SPECIFICATIONS

Stroke Frequency	200 per second / 12,000 per minute
Optimal Air Pressure	6 - 8 bar
Air Consumption	0.2 m ³ at 6 bar
Weight	785 gram
